Description of Request

QUESTION:
The west aluminum access doors on the west side of the building were prepped for standard dead bolt with keyed access. The specified dead bolt per spec section 08710 Hardware Group 4 will not function in these aluminum access doors. Is it permissible to utilize the provided aluminum access door dead bolts and make them a keyed access?

Respond By: 09/11/12 By: TIM THOLT

Response

Yes. Insure that there is a trim ring. The thumb turn handles that I saw installed were not trimmed out and the raw edges of the drilled prep were visible.
