QUESTION:
Why is there an exhaust duct in office 315 but no exhaust duct in the other offices on the second floor? Is a phoenix valve SAV 315 necessary for this office?

Respond By: 10/12/11 By: TIM THOLT

Response

The second floor offices are served by two supply valves (SAV-204/213) and two exhaust valves (GEX-214/219). The loads in the second floor offices are so small that individual valves and VAV controls were not necessary. Both SAV-315 and GEX-315 are required for office 315.

Signed: Michael Bender, GPD Date: 10/7/2011
